

MASSEY FERGUSON **LB** 2234XD

PROTECT YOUR HAY TO THE **MAX**

Product Features

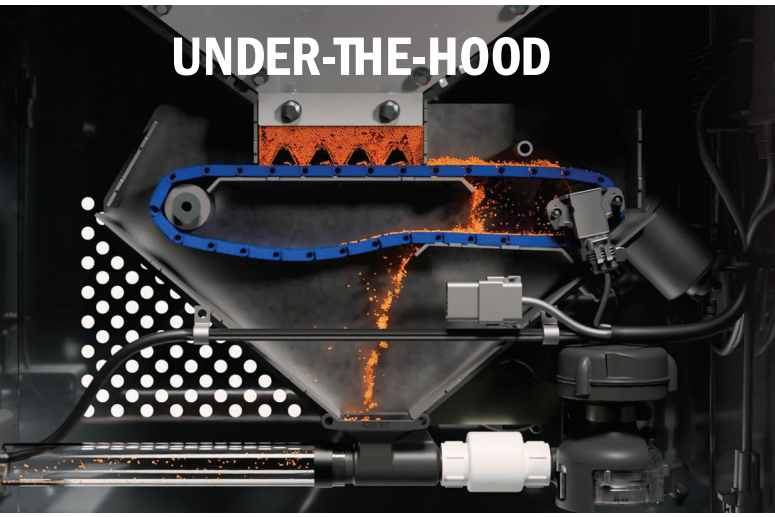

- Stainless steel / abrasion-resistant poly meter
- 4.0 cu ft hopper capacity
- Hopper bin level
- Crop eyes
- Blockage tube sensor
- External LED indicator

Technology Features

- ISOBUS electronics
- Product-specific calibrations
- Automatic & manual operation modes
- Target & actual rate feedback
- Variable rate application for moisture ranges

**ACCURATE
APPLICATION
VERSATILITY
SIMPLICITY**

UNDER-THE-HOOD

- Industry's first blockage detection
- Proprietary Baling Rate Management with select balers*
- More responsive product delivery compared to auger systems
- First fully automatic and integrated granular applicator on the market
- Compatible with 2100 Series** and newer Hesston by Massey Ferguson Large Square Balers

*Only with moisture and bale scale systems equipped on compatible balers through ISOBUS
** Depending on model year break

ORDERS OPEN STARTING FALL 2025

What's BaleMax™ Hay Preservative?

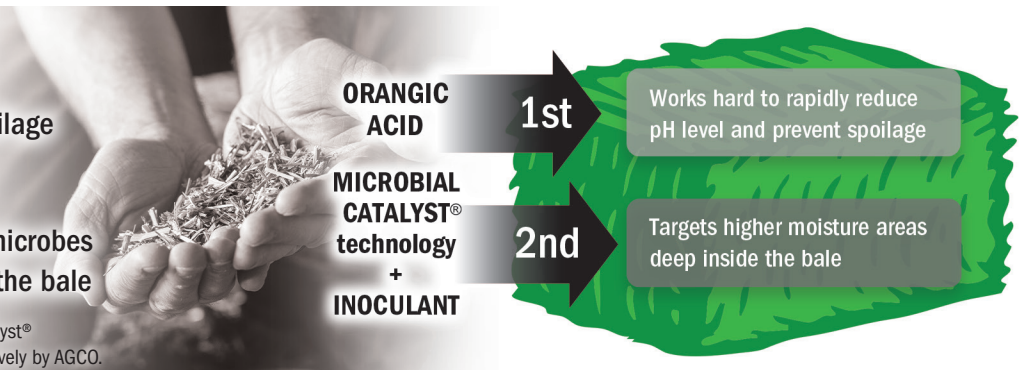

A dry granular product that:

- Preserves higher moisture hay baled between 16–23%
- Maintains hay quality over time
- Reduces the risk of heating and spoilage
- Improves palatability and digestibility

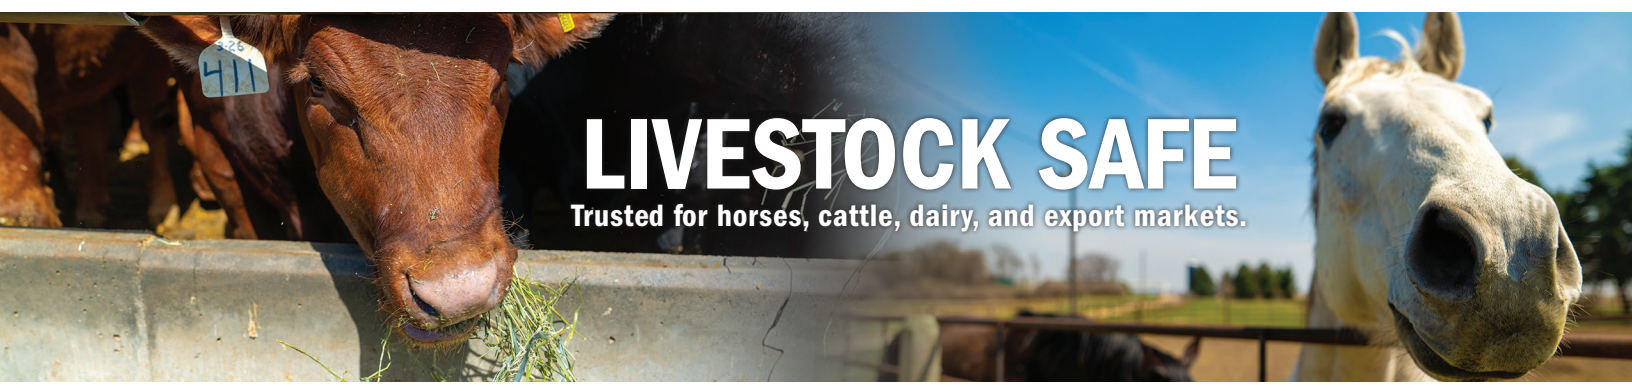

Apply to cured hay crop at a rate of 2 lb./ton at the recommended moisture levels.

What's Inside?

- Organic Acid: Quickly drops pH to prevent spoilage
- Inoculant: Delivers beneficial microbes
- Microbial Catalyst® technology*: Stimulates microbes and targets high-moisture pockets deep inside the bale

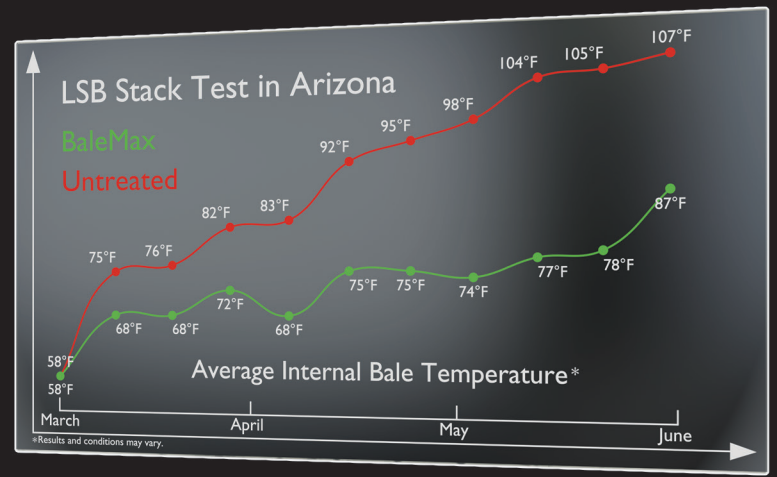

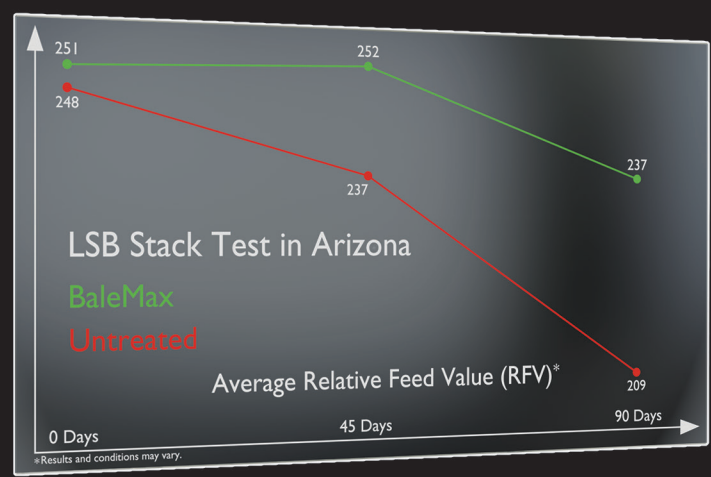

*Ralco, through its Agnition® brand, provides the patented Microbial Catalyst® technology behind BaleMax™, a microbial hay preservative offered exclusively by AGCO.

LIVESTOCK SAFE

Trusted for horses, cattle, dairy, and export markets.

PROVEN RESULTS
