LEAD THE FIELD.

20 & 24 Series

Grain Decks

Portable Productivity.

The all-new Brandt A-Series Grain Decks are portable grain pits designed to boost your harvest productivity. Eliminate the need to position a hopper multiple times under a trailer—simply drive over the conveyor to unload and get back to the field faster.

① Higher Productivity

The drive-over conveyor delivers the performance needed to save you time when unloading trucks:

- Choose between 20" models that move up to 15,000 bu/hr or 24" models capable of up to 18,500 bu/hr.
- Trucks and low trailers can easily clear the 5 ¾ inch deck height (6 ¾" with ramp extensions).
- Proven EZMOVE system is operator friendly for fast and easy positioning of your Grain Deck.

② Increased Uptime

The rugged design of the drive-over conveyor is purpose built to keep you working and worry free:

- The hopper (38" x 115") provides easy unloading, while the deck (7' x 12') ensures space for any truck and trailer.
- The patented EZTRAK tensioning and tracking system keeps your belt aligned and tensioned properly.
- Double-Lip Intake Sealing System all but eliminates leakage behind the belt; belt wiper extends belt life.

③ Lower Operating Cost

The Grain Deck is built with proven and reliable components to deliver an excellent return on investment:

- Gentle on pulses and seed, reducing impact damage caused by common grain handling systems.
- Needs less horsepower than conventional augers, making it compatible with a wider range of tractors.
- Enclosed belts and drive system deliver operator safety and superior protection against the elements.

20 & 24 Series Grain Decks

Specifications

	2010A	2015A	2410A	2415A
Performance				
Bushels per hour*	Up to 15,000	Up to 15,000	Up to 18,500	Up to 16,500

Hydraulic/ Electric/ Gas Drive

EZMOVE

Ramp Extensions

Bunker Kit

The Bunker Kit allows you to convert the Grain Deck and a Brandt Harvest Grain Belt to move in unison at 90° to your grain pile while operating with the tractor.

Oilseed-certified System

Safely use the Grain Deck with oilseeds, such as canola. The specialized V-Belt, additional seal kits, and roller-guarding protects the unit from excess material buildup in the event of oil exposure.
